

PoliedraSanità

Innovazione e sostenibilità

About us

Poliedra Sanità is a leading and skilled provider of integrated services in clinical engineering and an expert in management and maintenance of biomedical technologies.

Integrated Solutions

Poliedra Sanità offers unique and integrated solutions across all operational areas involving hospital technologies, designed to meet an increasingly sophisticated demand focused on reducing operating and management costs, to modernizing the equipment, and reorganizing and rationalization healthcare processes.

Advanced Partner

Poliedra Sanità target is to overcome the limits of the traditional Client–Supplier relationship by presenting itself as an advanced partner, capable not only of ensuring the highest performance and quality standards, but also of fully understanding the specific features and priorities of the Users who benefit from the provided services, developing customized solutions based on their specific needs.

Experience & Expertise

Poliedra Sanità operates across all the main areas of the healthcare field, from technological innovation to the integrated management of hospital and local facilities, from telemedicine services, digital health to logistics, up to home care and assistance for partner companies, with a sustainable and effective approach.

Business line

In the current setting, the Italian healthcare trade faces significant challenges, including the aging of the population, the increase of chronic diseases, the need for economic and environmental sustainability, and technological evolution. These factors require a rethinking of organizational models and the implement of innovative solutions to guarantee quality and efficient care.

HTM & DIM

The main focus is the organization, development, management and strategic monitoring of integrated services for the life cycle of biomedical technologies and clinical engineering services in their broader context, through an innovation- and sustainability-oriented approach. It also manage, with specialist expertise, aspects related to IT security and carries out refurbishing, revamping and retrofit operations on electro-medical equipment, guaranteeing efficient management of technological resources and creating economic and environmental value.

HEALTHCARE DIVISION

It designs, develops and manages actions and concessions to improve hospital management, home care and territorial care, as well as the implementation of telemedicine services. The Division oversees projects for the redevelopment and integrated management of health facilities, promotes innovative models for home-based care for frail people and ensures advanced technological solutions for an efficient and personalized telemedicine.

Focus - HTM & DIM

As a part of the HTM e DIM activities, Poliedra Sanità has established partnerships and freamework agreements with the main producers in order to optimize costs and ensure an ongoing training to its techincal staff.

Clinical engineering and technological global service

Technical and maintenance management of the hospital equipment for an overall governance of the life cycle of biomedical technologies.

Specialist service, critical care and multivendor service

Qualified technical support for critical care equipment and device management from different suppliers.

Diagnostic imaging

Advanced solutions for technologies related to diagnostic imaging, ensuring high performances and reliability.

Cybersecurity for biomedical devices

Implementation of cyber risk assesment, monitoring and mitigation in order to protect medical equipment form cyber threats.

Public and Private Partnership

Development and management of Public-Private Partnership projects.

Census and reconciliation of hospital assets

Research, tracebility and updating of all hospital assets.

Equipment and hospital assets

Cataloguing, control and optimization of aids used for mobility and personal support.

Management of surgical and endoscopy instruments

Organization and management of surgical instruments and rigid endoscopes, ensuring their availability and functioning.

Consulting & Training

Technical, specialistic and organizational tainig and consulting to manage biomedical technologies.

Focus – Healthcare Division

Integrated Hospital Management

Hospital Management Support regards contracts and procedures that provide for the assignment of the management of health activities and services with the purpose of achieving the redevelopment of health facilities or public hospital facilities:

- ◆ Redesign and renovation of hospital grounds, providing new equipment, furnishings and maintenance management;
- ◆ Energy requalification and management according to sustainability parameters;
- ◆ Ready-to-use management of specific departments (on call service) and/or displacement of medical/nursing/technical staff.

Home-care

Home-care management and, at large, territorial care management concerns contracts and procedures that require the assignment and authorization to provide medical, nursing, rehad, diagnostic, etc., provided by medical and social health staff who are qualified for the care and assistance of non self-sufficient people and people in fragile conditions:

- ◆ Project development and signing;
- ◆ Management/governance process;
- ◆ Management and investment in technologies, maintenance works, replacement equipment, supply of consumable healthcare materials;
- ◆ Monitoraggio dell'andamento della gestione utilizzando appropriati KPI.

Telemedicine services

The management of telemedicine services refers to procedures and contracts stipulated with Public Health Authorities Companies in order to support organizational and technological strategies which will ensure to manage operations and relationships with patients:

- ◆ Support national/regional customization solutions;
- ◆ Provide specific and dedicated technological solutions from «third-party companies» for advanced telemonitoring by level of complexity (level 2);
- ◆ Define and implement specific operational workflow;
- ◆ Detect dedicated staff in context where doctors and nurses are lacking.

Consulting & Training

Poliedra Sanità offers technical, specialist and organizational training for hospital design, construction and plant engineering also thanks to the constant and qualified support of its partners.

Management and disposal of medical waste

Poliedra Sanità offers management, organization logistics services for the disposal of medical waste using suitable and certified equipment.

Strengths

Poliedra Sanità offers to its Customers professionalism, competences and cutting-edge technological resources.

01

Biomedical Engineer leadership - Clinical Engineers of proven expertise drive technological and digital innovation ensuring cutting-edge solutions, optimized processes and excellent performance: the result is a more efficient, confident and high-performance organization.

02

Sustainable efficiency - Poliedra Sanità applies management and energy efficiency models aligned with the EU taxonomy, which reduce operating costs and enhance performance. Each initiative is guided by a rigorous ESG paradigm that ensures eco-efficiency, measurable social impact and transparent governance, creating lasting value for citizens and stakeholders.

03

PPP based models - Through the Project Finance (Public-Private Partnership projects) tool, Poliedra Sanità mobilizes private capital to modernize healthcare facilities, operational processes and enabling infrastructures, without burdening public budgets.

04

Synergies - Poliedra Sanità enhances the synergies with Coopservice Group, Green Wolf and Strategy Holding, proposing itself as a single interlocutor capable of integrating clinical engineering, operational services and structured finance. An integrated offer that ensures wide range of services, high execution capacity and significant mitigation of operational and economic risks.

Corporate structure

Coopservice is a well-established benchmark in the integrated management of services for the healthcare sector. With a widespread presence across Italy—serving over 300 healthcare facilities—Coopservice provides, among other services, on-site sterilization of surgical instruments and hospital waste, sanitization, hospital cleaning, security and video surveillance, hospital logistics, and facility management, ensuring quality and operational continuity within healthcare facilities.

Green Wolf offers high-level expertise in the design and implementation of innovative and scalable healthcare models. The company stands out for its specific expertise in developing advanced healthcare solutions based on Public-Private Partnership (PPP) models, with a particular focus on energy and environmental sustainability projects aligned with the European taxonomy. The expertise of Green Wolf lies also in its ability to integrate complex services through an approach driven by innovation and social and environmental sustainability.

Strategy Holding

Strategy Holding, a company specialized in strategic development and in the structuring of advanced finance solutions, is able to support Poliedra Sanità in identifying and implementing innovative, sustainable, and effective financial models to successfully manage complex projects in the healthcare sector.

Partnership

The *Healthcare Division* of KPMG offers a comprehensive range of integrated services, supporting the evolution of the national, regional, and local healthcare systems. Thanks to its deep expertise and leadership in the sector, KPMG has successfully delivered major projects in the healthcare field:

- **Intelligent Healthcare**

A journey to create value through AI-driven transformation

- **Healthcare Horizons Revisited**

The evolution of healthcare and the path toward inclusive care

- **Future of life sciences**

From tech-enabled connectivity and the strategic uses of AI to patient-centered supply chains

- **Artificial Intelligence and Machine Learning to improve services in the healthcare sector**

The Smart wAlting list solution

- **Healthcare Horizons**

The transformation of the healthcare system and the path toward inclusive care
